From a starting bank of £5,000, the total profits after just over two years was a life changing...

£1,163,378.61

Obviously, to achieve these kind of profits, stakes would need to be split between different betting exchanges and also traditional bookmakers so the bank may not have grown exactly as shown in this illustration. Also, most people would withdraw their profits long before stakes & profits reached such huge amounts. Nevertheless, this illustration does show the powerful potential of the Tyche Windfall system!
